NO-TOUCH CLEANING

A Better Cleaning Solution

From the Latest Name in Australian Cleaning

kaivac cleaning systems

One of many applications 'No-Touch Cleaning' can be used for is washrooms.

The Problems with Public Washrooms

50% of toilet seats are dirty . . .

20% of the time towel dispensers are empty . . .

40% of soap dispensers are empty at any given time . . .

The sink area has more bacteria than anywhere else in the washroom . . .

2 of the top 3 customers complaints are washroom-related . . .

Individuals use public washrooms between 3-5 times daily . . .

18% to 30% of building visitors will use the public washroom . . .

Dirty and poorly stocked washrooms continue to rank among the major complaints of people who have to use them. This does not have to be the case with kaivac's No-Touch Cleaning.

What Is No-Touch Cleaning?

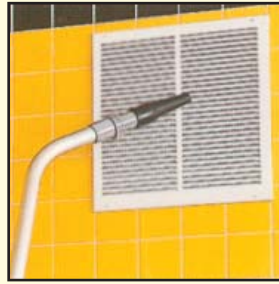

No-Touch Cleaning empowers workers to deep clean restrooms, kitchens, stairwells and many other areas without ever having to touch soiled, contaminated surfaces. It not only cleans better, but it cleans dramatically faster, leaving surfaces sparkling clean in one-third the time of conventional methods. You'll cut labour and chemical costs while raising workers morale and image.

The Problem: Poor Soil Removal With Traditional Methods.

Traditional cleaning methods use mops, buckets and wipers that simply spread dirty contaminated water around, failing to penetrate the nooks and crannies. Only a small portion of the soil is removed creating a breeding ground for germs and odour-causing bacteria. Worse, workers are forced to wipe contaminated surfaces by hand and crawl around filthy restrooms. Meanwhile, the complaints keep coming.

The Solution: No-Touch Cleaning Eliminates Soils.

Designed for total soil removal, No-Touch Cleaning combines an indoor pressure washer, chemical injection and wet vacuum technologies onto a single space-efficient platform. Workers simply spray cleaning solution on fixtures and floors, and then blast the soils to the floor with a high pressure water spray. Finally, they vacuum the floor dry completely removing soils and bacteria. The results are sparkling clean restrooms, kitchens, stairwells and more without ever touching a contaminated surface. No more soil, no more customer complaints.

Kaivac

The original Kaivac was designed to address the large capacity cleaning needs found in larger buildings, such as: high schools, universities, airports, convention centres, factories, warehouses, stadiums and large hospitals.

Kaizen

Kaizen was designed for smaller facilities that require the same cleaning power that the original Kaivac delivers, such as: elementary schools, hospitals and clinics, nursing homes, restaurants, office buildings and more.

No-Touch Cleaning Benefits

Reduced Costs

Labour - Restrooms can be cleaned in one-third the time of conventional methods, greatly reducing labour costs.

Equipment - Our equipment can replace carpet extractors, wet vacuums, pressure washers, grout cleaning machines, janitors carts etc.

Chemicals - The automatic chemical proportioning system assures proper chemical usage and reduces costly waste.

Job Satisfaction

No-Touch Cleaning improves workers morale and image, reducing turnover.

No More Trips To The Closet

No wasted time traveling back and forth to the janitors closet. Dirty water can be dumped into the nearest toilet and clean water fill-ups are at the nearest tap.

Safer

Workers no longer need to wipe toilets, urinals and other contaminated surfaces. Placing distance between workers and soiled surfaces reduces health risk and cross contamination.

No Back Strain

Our equipment can be dumped into toilets, eliminating the need to lift heavy buckets.

Easy To Learn And Use

Kaivac has developed a simple six step cleaning process that is easy to learn and use.

Videos And Training

Each machine comes with an instructional video that demonstrates our process.

Cleaner Buildings

No-Touch Cleaning completely removes soils and associated germs that conventional methods leave behind.

Odour Elimination

Consistent use of No-Touch Cleaning equipment leaves restrooms smelling fresh by removing odour-causing bacteria.

No-Touch Cleaning

MORE ACCESSORIES

KaiGrouter – Nothing cleans grout lines faster and better than this patent-pending tool.

KaiDolly – Turn your KaiVac unit into a janitor's closet on wheels.

KaiBlower – 300 mph air blast quickly dries surfaces and dusts high areas.

Upholstery Tool - Spot clean upholstery with this quick connecting accessory.

Carpet Extractor - Clean carpets and tight areas without an additional extraction machine.

KaiDrain – Place this self-securing tool in the middle of any puddle, and it acts as an instant drain.
